

Dear Parents / Carers,

To help support parents and carers with their children's learning we are holding maths workshops which demonstrate how we teach various methods in school. Attendees will also be able to take examples of the different methods home to refer to with their children.

There will be four sessions this term:

Monday 1st October 1pm – lower school four operation (+, -, x, ÷) methods

Monday 1st October 2pm – upper school four operation (+, -, x, ÷) methods

Monday 8th October 1pm - lower school fraction methods

Monday 8th October 2pm – upper school fraction methods

The above are areas that the children will be learning this term and next. It would benefit them greatly if they were also being supported at home as we no longer send home weekly maths homework. Methods are always improving and changing and therefore we feel it is important for parents to also keep up to date. Unfortunately, the sessions are for parents and carers only so children will not be able to attend.

If you would like to attend any of the sessions, tick the appropriate boxes below and ensure the names of all adults attending are listed, as we cannot guarantee additional places on the day. If you cannot make the times above but would like some guidance then please call the office and ask to speak to Miss Price.

Reply slips to be returned by Friday 21st September at the latest.

Attached to this letter is an overview of what your child will be learning and when in relation to maths and the first maths newsletter of the year. Your child will bring a maths newsletter home every week and it contains information on what they have been learning about specifically and what is coming up the following week.

Yours Sincerely

Miss E Price

Name/s:

I/We will be attending the lower school calculation session.

I/We will be attending the upper school calculation session.

I/We will be attending the lower school fractions session.

I/We will be attending the upper school fractions session.
