IMPACT						

The purpose of a risk assessment is not to eliminate all risks, but to put in place control measures in order to mitigate against them as far as possible. It is not realistic to expect that all risk measures should be rated as minor (green). The probability of something happening may be low, but should it happen, the impact would be high, and the risk would therefore be rated as red (severe). In practice, for example, if there was not sufficient cleaning capacity in place to clean an academy, the impact of this would be high, in that we would not be able to open the academy due to the stringent requirements around hygiene. This may therefore rate red on the risk assessment. This does not mean we do not have sufficient cleaning capacity, but only that should this be the case, the impact of this would be high.

Anyone in their household needs to self-isolate for 10 days (including siblings). • Any pupil or staff member needs to go home immediately if they have symptoms. They should take a test as soon as possible. • A child with symptoms awaiting collection needs to be isolated and kept at a distance of 2m from the supervising staff member, ideally in a well-ventilated place. PPE is required if this distance cannot be maintained or there is a risk of contaminated bodily fluids. • If the child uses the bathroom, it must be thoroughly disinfected before use by anyone else. • Everyone must wash their hands thoroughly for 20 seconds with soap and running water or use hand sanitiser after any contact with someone who is unwell. The area around the person with symptoms must be cleaned with disinfectant after they have left to reduce the risk of passing the infection on to other people. • Routinely taking the temperature of pupils is not recommended by Public Health England as this is an unreliable method for identifying coronavirus (COVID-19). <p>In addition:</p> <ul style="list-style-type: none"> • Staff are reminded that they have received training on infection control that gives them a good understanding of how the spread of coronavirus occurs and can be mitigated. • Infection control training is arranged for new staff. <p>2.
