

Maths this week:

AUTUMN TERM 1

WEEK 3

28/09/2018

In Year 3...

Year 3 have been working on adding and subtracting 10 and 100 - most children managed to crack this!

Next week, the children will be working on addition, building up to adding a one digit number to a two digit number:

+	27	+	39	+	40
	2		0		3

The year 3 teachers have been working hard to get the children confident with their 4 times tables. If they could do extra practise at home, the teachers would really appreciate it.

In Year 4...

In year 4, the children finished the week with Roman numerals. See if your child can tell you what numbers are shown below:

I V X L C D M
1 5 10 50 100 500 1000

Next week in year 4, the children will be counting in 25s and 1000s. Can your child add 25 or 1000 to the following numbers:

135	136	137	136	132	112
138	139	140	124	155	162
141	142	143	190	148	161

1. CLX
2. CCXC

Does your child know their 8 times tables?

In Year 5...

This week, year 5 have been working on negative numbers.

Can your child tell you the difference between the various numbers below:

-16 and 5

-9 and 18

13 and 36

-28 and -12

Next week in year 5, the children are working on addition.

The method is on the right hand side - see if your child would like to practise and get ahead of the class for next week!

$$\begin{array}{r} \text{€ } 23.59 \\ + \text{€ } 7.55 \\ \hline \text{€ } 31.14 \end{array}$$

$$\begin{array}{r} 19.01 \\ 3.65 \\ + 0.7 \\ \hline 23.36 \end{array}$$

In year 6, the children have been working on addition, subtraction and multiplication (+ - x). Have a look at the methods:

$$\begin{array}{r} 81,059 \\ 3,668 \\ 15,301 \\ + 20,551 \\ \hline 120,579 \end{array}$$

$$\begin{array}{r} \cancel{8} \cancel{1} \cancel{0}, 699 \\ - 89,949 \\ \hline 60,750 \end{array}$$

$$\begin{array}{r} 1234 \\ \times 16 \\ \hline 7404 \\ 12340 \\ \hline 19,744 \end{array}$$

Year 6 will be learning long division next week. Can your child count in multiples of, 11, 12, 13, 14, 15 and so on? As this will help them when dividing by two digit numbers.

$$\begin{array}{r} 27 \\ 36 \overline{) 972} \\ \underline{- 720} \\ 252 \\ \underline{- 252} \\ 0 \end{array}$$

Does your child know all of their times tables up to 12 x 12? This is a requirement for end of year 4 but some children are still not confident with them.
